

Taking the GREEN pledge!

I'm joining **JunkScience.com** making our world **GREENER!**

I Will (check items that apply):

- Increase personal use of ethanol derived from grape biomass and various grains and cereals
- Use more solar energy by taking longer beach vacations
- Only work Saturday and Sunday, making all other days weekend to reduce driving
- Open canned sodas slower to reduce rate of CO₂ emissions
- Gain weight - fat people are composed of more carbon than skinny people, thus keeping more carbon out of the environment
- Reduce CO₂-emissions by doing as little exercise as possible
- Reduce global methane emissions by eating more farm animals
- Avoid spicy foods to reduce personal emissions
- Campaign to sequester Congress and the U.N.
- Recycle environmentalists into biofuels
- Lobby Congress to fund flying carpet research to replace jet travel
- Help promote greater fuel efficiency by lobbying Congress to repeal the Law of Gravity

Will YOU take the pledge?
